

Edwin Tovar

QA Engineer | Manual & Automation Testing | AI-Driven QA | Buenos Aires, Argentina |
edwintovaraladejo@gmail.com | <https://linkedin.com/in/edwintovar>

Professional Summary

Senior QA Engineer specialized in quality assurance for Fintech, Banking, and Payment platforms. Expert in end-to-end testing — from requirements analysis through automation, execution, and reporting. Experienced in implementing AI-driven testing solutions that reduce manual effort, improve maintainability, and accelerate CI/CD pipelines. Skilled in automated visual validation, predictive defect analysis, and accessibility testing across web and mobile. Passionate about continuous improvement, process efficiency, and delivering high-quality products in Agile environments.

Technical Skills

Selenium, Testim.io, Mabl, Applitoools Eyes, Postman, AWS Lambda, MongoDB, Bitbucket, HP ALM, Insomnia, Xray, Jira, Confluence, REST, XML, SoapUI, TestRail, SQL

Work Experience

Senior QA Engineer

SOFI — 2023 — *April 2026*

Plan and execute manual and automated testing for Fintech platforms. Implement AI-driven testing solutions including Testim.io, Mabl, and Applitoools Eyes. Integrate testing suites into CI/CD pipelines for automated executions during each build and deployment. Perform API testing with Postman, cloud testing in AWS Lambda, and accessibility testing with NVDA and VoiceOver.

Technologies: Selenium, Testim.io, Mabl, Applitoools Eyes, Postman, AWS Lambda, MongoDB, Bitbucket

QA Tester Agile

Banco ICBC / IT Patagonia — 2022

Executed functional tests (Front-end, Back-end, API, Web Services). Designed and executed test cases for Corporate Home Banking. Used HP ALM, Postman, Insomnia, and Xray. Reported and tracked defects in Jira and Confluence.

Technologies: HP ALM, Postman, Insomnia, Xray, Jira, Confluence

Business Analyst III

Prisma Medios de Pagos — 2021 — 2022

Designed and executed functional and non-functional tests. Tested REST and XML services. Supported project coordination with Visa, MasterCard, and American Express. Generated test data and functional documentation.

Technologies: REST, XML, SoapUI, Postman

Functional Analyst / Senior QA Tester

Banco Galicia / Voolkia Software — 2019 — 2021

Gathered, analyzed, and designed adaptive and corrective requirements. Coordinated with Product Managers and Stakeholders. Executed manual testing and managed incident tracking.

Technologies: Jira, Confluence, TestRail, Selenium

Functional Analyst / QA Tester

Banesco Banco Universal — 2012 — 2018

Designed and executed functional test cases (Smoke, Exploratory, Regression). Created test plans and estimates. Detected and documented defects in Jira.

Technologies: Jira, HP ALM, SQL

Projects

AI-Driven Test Automation Suite

Implemented AI-powered testing solutions using Testim.io and Mabl for intelligent script creation and maintenance, reducing manual effort and improving test suite maintainability.

Technologies: Testim.io, Mabl, AppliTools Eyes, ChatGPT, Selenium

Fintech QA Platform

Planned and executed comprehensive manual and automated testing for Fintech platforms, integrating suites into CI/CD pipelines with Bitbucket for automated executions during builds and deployments.

Technologies: Selenium, Postman, AWS Lambda, MongoDB, Bitbucket CI/CD

Accessibility Testing Framework

Executed accessibility testing across web and mobile platforms using NVDA, VoiceOver, and TalkBack, ensuring WCAG compliance for banking applications.

Technologies: NVDA, VoiceOver, TalkBack, BrowserStack, Charles Proxy

Corporate Home Banking Testing

Designed and executed functional test cases for Corporate Home Banking platforms, covering front-end, back-end, API, and web services with comprehensive defect tracking.

Technologies: HP ALM, Postman, Insomnia, Xray, Jira

Education

Computer Engineer — Computer Engineering
